Digital Banking Operations | Payment Operations | QRIS & E-Wallet Operations | Incident & Problem Management | Application Support | SQL & Data Validation | Data Patching | Reconciliation | Root Cause Analysis (RCA) | SLA Management

TECHNICAL TOOLS

SQL (PostgreSQL, MS SQL Server) | Python (Pandas) | Microsoft Excel & VBA | Grafana | Jira | Confluence | CMS Banking Platforms | Process Maker & Signer

EXPERIENCE

Product Operation | Digital Operations – Digital Problem Management

Jun 2026 – Sep 2026

PT Bank Raya Indonesia Tbk – Digital Operation Division | South Jakarta, Indonesia

- **Incident & Problem Management** : Investigated and resolved 150+ digital banking incidents with a 96% resolution rate across Payment, Digisaving, and related digital banking services.
- **Payment Operations** : Investigated QRIS, interbank transfer, e-wallet, and merchant settlement issues, including failed transactions, deducted funds, delayed settlements, and balance discrepancies.
- **QRIS Merchant Operations** : Supported merchant registration, deletion, settlement monitoring, and daily reconciliation of QRIS transaction notifications and merchant funds.
- **Partner Coordination** : Coordinated incident investigation and resolution with engineering teams and 9+ external banking and payment partners, supporting cross-platform transaction issues within SLA.
- **Application Support** : Provided technical investigation and application support for Raya 2.0, covering face verification, customer data validation, login/activation, Raya Debit VISA activation, and ATM BRI transaction issues.
- **Data Patching** : Performed customer metadata updates and data patching, including referral code records and related customer information.
- **CMS Administration** : Processed Maker & Signer changes within the Corporate Management System (CMS), ensuring accurate and timely updates.
- **System Monitoring** : Conducted proactive Grafana monitoring to identify potential operational issues and support service continuity.
- **Documentation & SLA** : Maintained incident records, investigation findings, and operational follow-ups through Jira and Confluence in accordance with SLA and IT operational procedures.

- **Data Validation** : Performed SQL-based data validation and troubleshooting, achieving >99% data accuracy and reducing data anomaly risks in operational reporting.
- **Process Automation** : Automated recurring reporting workflows using Microsoft Excel Macros and optimized SQL queries, cutting data processing time by 20% and improving operational efficiency.
- **Data Migration & Access Management** : Supported data migration for 100+ users to the FRAOnline platform using Role-Based Access Control (RBAC), ensuring data integrity and accurate access provisioning.
- **Technical Incident Resolution** : Investigated and resolved 400+ data-related technical incidents with a >95% success rate in accordance with SLA requirements.
- **Data Troubleshooting** : Performed data verification, query analysis, and troubleshooting to identify and resolve discrepancies affecting daily operational data retrieval and reporting.
